Eastern Gainesville and Alachua County (32609 and 32641) have a **relative and absolute shortage** of medical, dental and mental health providers located in their geography relative to the population.

Even more notably, **after hours and weekend healthcare is lacking** in the same area. Central and western Gainesville and Alachua County have many care options.

2020 Alachua County Health Assessment shows 32609 and 32641 with **highest rates of ER visits** for “avoidable hospital admissions,” dental care and mental health.

What we are doing now – good, but doesn't fully meet the need

UF Health Family Medicine Main

- PCMH open M-F – 8a-5p
- > 30,000 visits annually
- Family medicine residency program home base
- On-site x-ray and lab
- Clinical pharmacy services
- Some social services support
- Home base for Equal Access Clinic

UF Health Family Medicine Eastside

- PCMH open M-F – 8a-5p
- 14,000 patient visits annually
- Onsite lab services
- Clinical pharmacy services
- Dental services co-located provided by FQHC (AZA Health)

What we would like to do to better meet the need

- UF Health Urgent Care Center in Eastern Gainesville-Alachua County
- Phase 1 medial building approximately 10,000 sq. ft.
- Open 7 days a week
- Walk up/Walk-in seven days
- Patient ages – 1-99+
- Insurance and self-pay accepted
- On-site x-ray and lab
- Project 12-15,000 patient visits/year for Phase 1
 - Phase 1 – Medical Services
 - Phase 2+ - dental, mental health and others
- Initial staffing around 13 FTE

Site proposal – Hawthorne Road

- Population density, ED use and traffic drive by data suggest that optimal location is North or East of the Waldo/Hawthorne Roads interchange
- Additional advantages to site location on 13 acres on Hawthorne Road East of Waldo Road just West of GTECH incubator
- Includes Hawthorne Road frontage with room for future expansion
- Available for immediate development
