2	1.00	<p>Provide alternate power source and (2) 200 amp panels to provide temporary power to all critical circuits being fed from UPS #1 in the CCC building. This portion of the project will take place several days in advance of the UPS swap out to the new unit, provided by and installed by EOLA power.</p> <p>When the new unit is set in place, connected, and running, we will swap all of the circuits back in to the new unit, connect and label accordingly. We will then remove all of the temporary power source.</p> <p>During this period there will be NO UPS backup for all circuits, but will be emergency fed from the generator if needed. We need a week in advance to install the temporary power source from panel E1 in the main electrical room approximately 1 00' west of the Data room.</p> <p>Total of (2) outages with a maximum of a fifteen minutes each shall be expected, but more than likely, will be only a few minutes for each occasion.</p> <p>Rigging-Setting UPS in place along with battery cabinet and Bypass Cabinet. Rigging and disposal Includes:</p>	Electrical and rigging	\$21,087.50	\$21,087.50

		Removal and disposal of old UPS and Batteries per EPA regulations. Delivery and staging of new UPS.
