Emergency Circumstances (Type In Your information for Printing): After the NW 43rd Street milling and resurfacing project, a void formed under the sidewalk and caused it to collapse immediately south of NW 51st PI. Additional investigation was needed to determine what was causing the void and it has been determined that the void was due to issues in approximately 350' of drainage pipe. A proposal was received 11/20/19 to clean out and place cured-in-place pipe (CIPP) liner in the existing 30" culvert. The proposal utilizes the annual contract prices with the City of Daytona Beach. Due to the possible immediate collapse of additional sidewalk sections and portions of the roadway, it is imperative to fix it quickly to limit the liability of the hazardous situation as additionally voids could exist under NW 51st PI and NW 51st PI or NW 43rd St could collapse due to the condition of the pipe.

Recommended Action (Type In Your information and Print):
