Term: October 1, 2019 - September 30, 2020

Contract: FSA19-VEH17.0 , Heavy Trucks and Equipment

Group: GENERATOR: 125kW Generator Package

Item: 98, AKSA, ULJ-125, ULJ-125

**Description:** GENERATOR REQUIREMENTS: Standby duty rated at 125.0 kW, 156.3 KVA, 8 power factor; 480 volts; 3 phase, 60 hertz, 1800 rpm; Directly connected to the engine flywheel housing with flex coupling; Generator shall meet performance class G3 of IEC; Unit shall be in compliance with and be UL 2200 labeled. ENGINE: Water cooled diesel engine, sized for generator set; Emission compliant engine. CONTROLS: Solid state, microprocessor-based generator controls; Controls shall provide all operating, monitoring and control functions for generator set. ENCLOSURE/SILENCER: Complete diesel engine generator set including control panel, engine starting batteries and fuel oil tank shall be enclosed in a factory assembled water protective, sound attenuated enclosure; Critical grade silencer; Companion flanges; Flexible stainless-steel exhaust. FUEL TANK: Double wall sub-base tank integral to enclosure; 24-hour capacity at 100% at full load; Rupture basin with 110% capacity; Locking fuel caps; Mechanical fuel level gauge; Low fuel level alarm contact; Fuel tank rupture alarm contact; Must meet UL 142 and FDEP standards. BATTERY CHARGER: Current limiting battery charger to automatically charge batteries; Charger shall be dual charge rate with automatic switching to boost rate when required; Charger shall be mounted on genset package. STARTUP AND TESTING: Vendor must coordinate all startup and testing activities with the engineer and owner. After installation is completed by others and normal power is available, the vendor must perform a one (1) day startup including the use of building load; The startup technician will instruct all necessary personnel how to operate and maintain the equipment in accordance to the manufacturer's requirements. CONDITIONS: In addition to equipment specified, each generator shall be equipped with all standard equipment as specified by the manufacture for this model and shall include but not be limited to the following necessary items: Initial filling of oil and antifreeze (fuel provided by others); Shrink wrap applied to the product to ensure a clean finish; During the startup, the technician shall record the following information and provide to the owner for his records: Record Operating Voltage, Hz, Ph, and connected load (Amperage); Package information consisting of make of generator (Cat, Wacker, or Tradewinds), model (TJ125 TP20, DP125, etc.), Serial number of complete package, and startup date; Record engine and generator serial numbers; One complete set of operation and maintenance manuals; Two (2) year or 1500-hour standard standby generator warranty; Labor, materials, and travel for the warranty period repair will be paid by manufacturer during normal business hours.

**Bid Award**

Term: October 1, 2019 - September 30, 2020

Contract: FSA19-VEH17.0 , Heavy Trucks and Equipment

Group: GENERATOR: 125kW Generator Package

Item: 103, Gillette Generators, SPJD-1250, SPJD-1250

**Description:** GENERATOR REQUIREMENTS: Standby duty rated at 125.0 kW, 156.3 KVA, 8 power factor; 480 volts; 3 phase, 60 hertz, 1800 rpm; Directly connected to the engine flywheel housing with flex coupling; Generator shall meet performance class G3 of IEC; Unit shall be in compliance with and be UL 2200 labeled. ENGINE: Water cooled diesel engine, sized for generator set; Emission compliant engine. CONTROLS: Solid state, microprocessor-based generator controls; Controls shall provide all operating, monitoring and control functions for generator set. ENCLOSURE/SILENCER: Complete diesel engine generator set including control panel, engine starting batteries and fuel oil tank shall be enclosed in a factory assembled water protective, sound attenuated enclosure; Critical grade silencer; Companion flanges; Flexible stainless-steel exhaust. FUEL TANK: Double wall sub-base tank integral to enclosure; 24-hour capacity at 100% at full load; Rupture basin with 110% capacity; Locking fuel caps; Mechanical fuel level gauge; Low fuel level alarm contact; Fuel tank rupture alarm contact; Must meet UL 142 and FDEP standards. BATTERY CHARGER: Current limiting battery charger to automatically charge batteries; Charger shall be dual charge rate with automatic switching to boost rate when required; Charger shall be mounted on genset package. STARTUP AND TESTING: Vendor must coordinate all startup and testing activities with the engineer and owner. After installation is completed by others and normal power is available, the vendor must perform a one (1) day startup including the use of building load; The startup technician will instruct all necessary personnel how to operate and maintain the equipment in accordance to the manufacturer's requirements. CONDITIONS: In addition to equipment specified, each generator shall be equipped with all standard equipment as specified by the manufacture for this model and shall include but not be limited to the following necessary items: Initial filling of oil and antifreeze (fuel provided by others); Shrink wrap applied to the product to ensure a clean finish; During the startup, the technician shall record the following information and provide to the owner for his records: Record Operating Voltage, Hz, Ph, and connected load (Amperage); Package information consisting of make of generator (Cat, Wacker, or Tradewinds), model (TJ125 TP20, DP125, etc.), Serial number of complete package, and startup date; Record engine and generator serial numbers; One complete set of operation and maintenance manuals; Two (2) year or 1500-hour standard standby generator warranty; Labor, materials, and travel for the warranty period repair will be paid by manufacturer during normal business hours.

**Term:** October 1, 2019 - September 30, 2020

**Contract:** FSA19-VEH17.0 , Heavy Trucks and Equipment

**Group:** GENERATOR: 150kW Mobile Generator Package

**Item:** 106, Atlas Copco, QAS 250, QAS 250

**Description:** GENERATOR REQUIREMENTS: Standby duty rated at 150kwe, 187kva, 8 power factor; Prime power duty rating 135kwe, 168kva, 0.8 power factor; Main Breaker shall be equipped with shunt trip; Generator end shall be Direct coupled to the engine flywheel with a flexible coupling; Generator shall meet performance class G3 of IEC; Jacket water heater. ENGINE: 6-cylinder, water cooled, 1800rpm, diesel engine; Current emission compliant diesel engine; Spin on fuel and oil filters. VOLTAGE CHANGE OVER SWITCH & DISTRIBUTION: Manual 3 position voltage change over switch to select each voltage as specified when the unit is not running. b. 1ph 120/240, 3ph 120/240, 3ph 120/208, and 3ph 277/480; A five-point connection shall be provided for ease of connection of load leads; One 50amp, 120/240vac, 1 ph, twist lock receptacle; One 30amp, 120/240vac, 1 ph, RV type receptacle; Two 20amp, 120/240vac, 1 ph, duplex receptacle; Two 20amp, 120/240vac, 1ph, duplex GFI receptacle; Each receptacle shall be protected by a individual circuit breaker; A receptacle shall be provided to power both the jacket water heater and on-board battery charger; Two thumb screw type connection points shall be provided for remote auto start. CONTROLS: Solid state, microprocessor-based generator controls; Controls shall provide all operating, monitoring and control functions for the generator set. Controls shall provide for auto start/stop functions; A emergency stop push button will be installed; A voltage adjustment shall be provided in the panel to adjust voltage in all voltage positions; A switch shall be provided in the panel to turn all power off in the panel if not being used. ENCLOSURE: Complete diesel engine generator set including control panel, engine starting batteries and fuel tank shall be enclosed in a factory assembled weather protective, sound attenuated enclosure; The sound attenuated enclosure noise level is not to exceed 73 – 75dba @ 21 feet; Oil and water drain lines shall be provided and extend to the enclosure wall with valves for easy service; Critical grade silencer; Companion flanges; Flexible exhaust-flex; Keyed alike lockable doors. IN BASE FUEL TANK TRAILER: Trailer shall be DOT approved with proper serial number data plate indicating weight capacity minimum of 10,000 lbs; Trailer will have dual axles with torque springs to reduce overall height of package; Standard 7 or 5 pin vehicle hitch receiver to be supplied; Trailer will have two rear level jacks with sand shoes and front leveling jack; Trailer will have hydraulic brakes; Trailer will have all necessary safety equipment to include but not be limited to an adjustable and removable pintle hitch, 30-inch safety chains, fenders, lights per DOT, and break away cable; Tires will be minimum load range type "D" (8 ply rating) with matching steel rims. Rims are to be finish painted; Minimum 8-hour capacity at 75% load rating to determine single wall tank size; A mechanical fuel gauge will be provided; Locking fuel cap; Low fuel level alarm; All necessary vents and caps will be provided along with suction, return, and drain points. BATTERY CHARGER: Battery will be installed in holding container with battery cables; Current limiting battery charger to automatically charge batterie; Charger shall be dual charge rate with automatic switching to boost rate when required; Charger mounted inside generator set package; Fully charged battery will be provided at time of delivery and startup. STARTUP & COMMISSIONING: One (1) day startup including operational test of equipment showing proper connection of cables with safety issues performed by a factory trained technician; The startup technician will instruct personnel how to operate and maintain the equipment in accordance with the manufacturer's requirements. CONDITIONS: In addition to equipment specified, each generator shall be equipped with all standard equipment as specified by the manufacturer for this model and shall include but not be limited to the following items: All product shall be new and of current design; Initial filling of oil and antifreeze (diesel fuel by others); During startup, the technician shall record the following information and provide to owner for his records: Operating Voltage, Hertz, Phase, and connected load (Amperage) [if any]; Package information consisting of Make of generator (Cat, Wacker, or Tradewinds), Model (TJ125 TP20, DP125, etc.); Serial number of complete package, and startup date; Written Information consisting of make, model, serial number, and startup date; Record Engine and Generator Serial numbers; One complete set of operation and maintenance manuals; Two (2) year or 1500-hour standard mobile generator warranty will apply. Generator to be transported to authorized servicing dealer for warranty repair during normal business hours; TRAILER: The trailer must have a VIN and a certificate of origin.

Term: October 1, 2019 - September 30, 2020

Contract: FSA19-VEH17.0 , Heavy Trucks and Equipment

Group: GENERATOR: 150kW Mobile Generator Package

Item: 108, Chicago Pneumatic, CPG-250 T4F, CPG-250 T4F

**Description:** GENERATOR REQUIREMENTS: Standby duty rated at 150kwe, 187kva, 8 power factor; Prime power duty rating 135kwe, 168kva, 0.8 power factor; Main Breaker shall be equipped with shunt trip; Generator end shall be Direct coupled to the engine flywheel with a flexible coupling; Generator shall meet performance class G3 of IEC; Jacket water heater. ENGINE: 6-cylinder, water cooled, 1800rpm, diesel engine; Current emission compliant diesel engine; Spin on fuel and oil filters. VOLTAGE CHANGE OVER SWITCH & DISTRIBUTION: Manual 3 position voltage change over switch to select each voltage as specified when the unit is not running. b. 1ph 120/240, 3ph 120/240, 3ph 120/208, and 3ph 277/480; A five-point connection shall be provided for ease of connection of load leads; One 50amp, 120/240vac, 1 ph, twist lock receptacle; One 30amp, 120/240vac, 1 ph, RV type receptacle; Two 20amp, 120/240vac, 1 ph, duplex receptacle; Two 20amp, 120/240vac, 1ph, duplex GFI receptacle; Each receptacle shall be protected by a individual circuit breaker; A receptacle shall be provided to power both the jacket water heater and on-board battery charger; Two thumb screw type connection points shall be provided for remote auto start. CONTROLS: Solid state, microprocessor-based generator controls; Controls shall provide all operating, monitoring and control functions for the generator set. Controls shall provide for auto start/stop functions; A emergency stop push button will be installed; A voltage adjustment shall be provided in the panel to adjust voltage in all voltage positions; A switch shall be provided in the panel to turn all power off in the panel if not being used. ENCLOSURE: Complete diesel engine generator set including control panel, engine starting batteries and fuel tank shall be enclosed in a factory assembled weather protective, sound attenuated enclosure; The sound attenuated enclosure noise level is not to exceed 73 – 75dba @ 21 feet; Oil and water drain lines shall be provided and extend to the enclosure wall with valves for easy service; Critical grade silencer; Companion flanges; Flexible exhaust-flex; Keyed alike lockable doors. IN BASE FUEL TANK TRAILER: Trailer shall be DOT approved with proper serial number data plate indicating weight capacity minimum of 10,000 lbs; Trailer will have dual axles with torque springs to reduce overall height of package; Standard 7 or 5 pin vehicle hitch receiver to be supplied; Trailer will have two rear level jacks with sand shoes and front leveling jack; Trailer will have hydraulic brakes; Trailer will have all necessary safety equipment to include but not be limited to an adjustable and removable pintle hitch, 30-inch safety chains, fenders, lights per DOT, and break away cable; Tires will be minimum load range type "D" (8 ply rating) with matching steel rims. Rims are to be finish painted; Minimum 8-hour capacity at 75% load rating to determine single wall tank size; A mechanical fuel gauge will be provided; Locking fuel cap; Low fuel level alarm; All necessary vents and caps will be provided along with suction, return, and drain points. BATTERY CHARGER: Battery will be installed in holding container with battery cables; Current limiting battery charger to automatically charge batterie; Charger shall be dual charge rate with automatic switching to boost rate when required; Charger mounted inside generator set package; Fully charged battery will be provided at time of delivery and startup. STARTUP & COMMISSIONING: One (1) day startup including operational test of equipment showing proper connection of cables with safety issues performed by a factory trained technician; The startup technician will instruct personnel how to operate and maintain the equipment in accordance with the manufacturer's requirements. CONDITIONS: In addition to equipment specified, each generator shall be equipped with all standard equipment as specified by the manufacturer for this model and shall include but not be limited to the following items: All product shall be new and of current design; Initial filling of oil and antifreeze (diesel fuel by others); During startup, the technician shall record the following information and provide to owner for his records: Operating Voltage, Hertz, Phase, and connected load (Amperage) [if any]; Package information consisting of Make of generator (Cat, Wacker, or Tradewinds), Model (TJ125 TP20, DP125, etc.); Serial number of complete package, and startup date; Written Information consisting of make, model, serial number, and startup date; Record Engine and Generator Serial numbers; One complete set of operation and maintenance manuals; Two (2) year or 1500-hour standard mobile generator warranty will apply. Generator to be transported to authorized servicing dealer for warranty repair during normal business hours; TRAILER: The trailer must have a VIN and a certificate of origin.

**Term:** October 1, 2019 - September 30, 2020

**Contract:** FSA19-VEH17.0 , Heavy Trucks and Equipment

**Group:** GENERATOR: 150kW Mobile Generator Package

**Item:** 112, LJP , AT150, AT150

**Description:** GENERATOR REQUIREMENTS: Standby duty rated at 150kwe, 187kva, 8 power factor; Prime power duty rating 135kwe, 168kva, 0.8 power factor; Main Breaker shall be equipped with shunt trip; Generator end shall be Direct coupled to the engine flywheel with a flexible coupling; Generator shall meet performance class G3 of IEC; Jacket water heater. ENGINE: 6-cylinder, water cooled, 1800rpm, diesel engine; Current emission compliant diesel engine; Spin on fuel and oil filters. VOLTAGE CHANGE OVER SWITCH & DISTRIBUTION: Manual 3 position voltage change over switch to select each voltage as specified when the unit is not running. b. 1ph 120/240, 3ph 120/240, 3ph 120/208, and 3ph 277/480; A five-point connection shall be provided for ease of connection of load leads; One 50amp, 120/240vac, 1 ph, twist lock receptacle; One 30amp, 120/240vac, 1 ph, RV type receptacle; Two 20amp, 120/240vac, 1 ph, duplex receptacle; Two 20amp, 120/240vac, 1ph, duplex GFI receptacle; Each receptacle shall be protected by a individual circuit breaker; A receptacle shall be provided to power both the jacket water heater and on-board battery charger; Two thumb screw type connection points shall be provided for remote auto start. CONTROLS: Solid state, microprocessor-based generator controls; Controls shall provide all operating, monitoring and control functions for the generator set. Controls shall provide for auto start/stop functions; A emergency stop push button will be installed; A voltage adjustment shall be provided in the panel to adjust voltage in all voltage positions; A switch shall be provided in the panel to turn all power off in the panel if not being used. ENCLOSURE: Complete diesel engine generator set including control panel, engine starting batteries and fuel tank shall be enclosed in a factory assembled weather protective, sound attenuated enclosure; The sound attenuated enclosure noise level is not to exceed 73 – 75dba @ 21 feet; Oil and water drain lines shall be provided and extend to the enclosure wall with valves for easy service; Critical grade silencer; Companion flanges; Flexible exhaust-flex; Keyed alike lockable doors. IN BASE FUEL TANK TRAILER: Trailer shall be DOT approved with proper serial number data plate indicating weight capacity minimum of 10,000 lbs; Trailer will have dual axles with torque springs to reduce overall height of package; Standard 7 or 5 pin vehicle hitch receiver to be supplied; Trailer will have two rear level jacks with sand shoes and front leveling jack; Trailer will have hydraulic brakes; Trailer will have all necessary safety equipment to include but not be limited to an adjustable and removable pintle hitch, 30-inch safety chains, fenders, lights per DOT, and break away cable; Tires will be minimum load range type "D" (8 ply rating) with matching steel rims. Rims are to be finish painted; Minimum 8-hour capacity at 75% load rating to determine single wall tank size; A mechanical fuel gauge will be provided; Locking fuel cap; Low fuel level alarm; All necessary vents and caps will be provided along with suction, return, and drain points. BATTERY CHARGER: Battery will be installed in holding container with battery cables; Current limiting battery charger to automatically charge batterie; Charger shall be dual charge rate with automatic switching to boost rate when required; Charger mounted inside generator set package; Fully charged battery will be provided at time of delivery and startup. STARTUP & COMMISSIONING: One (1) day startup including operational test of equipment showing proper connection of cables with safety issues performed by a factory trained technician; The startup technician will instruct personnel how to operate and maintain the equipment in accordance with the manufacturer's requirements. CONDITIONS: In addition to equipment specified, each generator shall be equipped with all standard equipment as specified by the manufacturer for this model and shall include but not be limited to the following items: All product shall be new and of current design; Initial filling of oil and antifreeze (diesel fuel by others); During startup, the technician shall record the following information and provide to owner for his records: Operating Voltage, Hertz, Phase, and connected load (Amperage) [if any]; Package information consisting of Make of generator (Cat, Wacker, or Tradewinds), Model (TJ125 TP20, DP125, etc.); Serial number of complete package, and startup date; Written Information consisting of make, model, serial number, and startup date; Record Engine and Generator Serial numbers; One complete set of operation and maintenance manuals; Two (2) year or 1500-hour standard mobile generator warranty will apply. Generator to be transported to authorized servicing dealer for warranty repair during normal business hours; TRAILER: The trailer must have a VIN and a certificate of origin.

**Term:** October 1, 2019 - September 30, 2020

**Contract:** FSA19-VEH17.0 , Heavy Trucks and Equipment

**Group:** GENERATOR: 150kW Mobile Generator Package

**Item:** 115, Wacker Neuson, G180, G180

**Description:** GENERATOR REQUIREMENTS: Standby duty rated at 150kwe, 187kva, 8 power factor; Prime power duty rating 135kwe, 168kva, 0.8 power factor; Main Breaker shall be equipped with shunt trip; Generator end shall be Direct coupled to the engine flywheel with a flexible coupling; Generator shall meet performance class G3 of IEC; Jacket water heater. ENGINE: 6-cylinder, water cooled, 1800rpm, diesel engine; Current emission compliant diesel engine; Spin on fuel and oil filters. VOLTAGE CHANGE OVER SWITCH & DISTRIBUTION: Manual 3 position voltage change over switch to select each voltage as specified when the unit is not running. b. 1ph 120/240, 3ph 120/240, 3ph 120/208, and 3ph 277/480; A five-point connection shall be provided for ease of connection of load leads; One 50amp, 120/240vac, 1 ph, twist lock receptacle; One 30amp, 120/240vac, 1 ph, RV type receptacle; Two 20amp, 120/240vac, 1 ph, duplex receptacle; Two 20amp, 120/240vac, 1ph, duplex GFI receptacle; Each receptacle shall be protected by a individual circuit breaker; A receptacle shall be provided to power both the jacket water heater and on-board battery charger; Two thumb screw type connection points shall be provided for remote auto start. CONTROLS: Solid state, microprocessor-based generator controls; Controls shall provide all operating, monitoring and control functions for the generator set. Controls shall provide for auto start/stop functions; A emergency stop push button will be installed; A voltage adjustment shall be provided in the panel to adjust voltage in all voltage positions; A switch shall be provided in the panel to turn all power off in the panel if not being used. ENCLOSURE: Complete diesel engine generator set including control panel, engine starting batteries and fuel tank shall be enclosed in a factory assembled weather protective, sound attenuated enclosure; The sound attenuated enclosure noise level is not to exceed 73 – 75dba @ 21 feet; Oil and water drain lines shall be provided and extend to the enclosure wall with valves for easy service; Critical grade silencer; Companion flanges; Flexible exhaust-flex; Keyed alike lockable doors. IN BASE FUEL TANK TRAILER: Trailer shall be DOT approved with proper serial number data plate indicating weight capacity minimum of 10,000 lbs; Trailer will have dual axles with torque springs to reduce overall height of package; Standard 7 or 5 pin vehicle hitch receiver to be supplied; Trailer will have two rear level jacks with sand shoes and front leveling jack; Trailer will have hydraulic brakes; Trailer will have all necessary safety equipment to include but not be limited to an adjustable and removable pintle hitch, 30-inch safety chains, fenders, lights per DOT, and break away cable; Tires will be minimum load range type "D" (8 ply rating) with matching steel rims. Rims are to be finish painted; Minimum 8-hour capacity at 75% load rating to determine single wall tank size; A mechanical fuel gauge will be provided; Locking fuel cap; Low fuel level alarm; All necessary vents and caps will be provided along with suction, return, and drain points. BATTERY CHARGER: Battery will be installed in holding container with battery cables; Current limiting battery charger to automatically charge batterie; Charger shall be dual charge rate with automatic switching to boost rate when required; Charger mounted inside generator set package; Fully charged battery will be provided at time of delivery and startup. STARTUP & COMMISSIONING: One (1) day startup including operational test of equipment showing proper connection of cables with safety issues performed by a factory trained technician; The startup technician will instruct personnel how to operate and maintain the equipment in accordance with the manufacturer's requirements. CONDITIONS: In addition to equipment specified, each generator shall be equipped with all standard equipment as specified by the manufacturer for this model and shall include but not be limited to the following items: All product shall be new and of current design; Initial filling of oil and antifreeze (diesel fuel by others); During startup, the technician shall record the following information and provide to owner for his records: Operating Voltage, Hertz, Phase, and connected load (Amperage) [if any]; Package information consisting of Make of generator (Cat, Wacker, or Tradewinds), Model (TJ125 TP20, DP125, etc.); Serial number of complete package, and startup date; Written Information consisting of make, model, serial number, and startup date; Record Engine and Generator Serial numbers; One complete set of operation and maintenance manuals; Two (2) year or 1500-hour standard mobile generator warranty will apply. Generator to be transported to authorized servicing dealer for warranty repair during normal business hours; TRAILER: The trailer must have a VIN and a certificate of origin.

ENCLOSURE/SILENCER: Complete diesel engine generator set including control panel, engine starting batteries and fuel oil tank shall be enclosed in a factory assembled weather protective, sound attenuated enclosure with oil and water drain lines; Enclosure shall be constructed from aluminum, preferably out of .125 thickness and 5058 marine grade aluminum; Critical grade silencer (25DB Reduction); Companion flanges; Flexible stainless-steel exhausts flex. FUEL TANKS: Double wall sub-base diesel fuel tank shall be integral to the enclosure; 24-hour capacity at 75% load rating; Rupture basin will be of 110% capacity; Locking fuel caps; All necessary vents and caps will be provided; Mechanical fuel level gauge; Low fuel level alarm contact; Fuel tank rupture basin alarm contact; Must meet UL 142 and FDEP standards. BATTERY CHARGER: Current limiting battery charger to automatically charge batteries; Charger shall be dual charge rate with automatic switching to boost rate when required; Charger shall be mounted on genset package. DELIVERY: Net cost includes delivery of equipment to governmental site location; Coordination and offloading of the equipment at the governmental site location will be the responsibility of the purchasing agency. STARTUP AND COMMISSIONING: Vendor must coordinate all startup and testing activities with the engineer and owner; After installation has been completed, approved by the local electrical inspector, and normal power is available, the vendor will perform a one (1) day startup including the use of building load; The startup technician will instruct all necessary personnel how to operate and maintain the equipment in accordance to the manufacturer's requirements. CONDITIONS: In addition to equipment specified, each generator shall be equipped with all standard equipment as specified by the manufacture for this model and shall include but not be limited to the following necessary items: Initial filling of oil and antifreeze; Shrink Wrap applied to the product to ensure a clean finish; During the startup, the technician shall record the following information and provide to the owner for his records: Record Operating Voltage, Hz, Ph, and connected load (Amperage); Package Information consisting of Make, Model, Serial number, and Startup Date; Record Engine and Generator Serial numbers. One complete set of operation and maintenance manuals; Two (2) years or 1000 hours standard standby generator warranty, whichever occurs first; Labor, materials, and travel for the warranty period repair will be paid by manufacturer during normal business hours.

Term: October 1, 2019 - September 30, 2020

Contract: FSA19-VEH17.0 , Heavy Trucks and Equipment

Group: GENERATOR: 500kW Generator Package

Item: 123, Tradewinds, T500, T500

**Description:** GENERATOR REQUIREMENTS: Standby duty rated at 500kwe, 625kva, 0.8 power factor; 480 volts; Voltage options are: 120/240, 120/208 or 277/480 3ph; Directly connected to the engine flywheel housing with a flex coupling; Generator shall meet performance class G3 of IEC; Unit shall be compliance with UL 2200 specifications. ENGINE: 6-cylinder, water cooled, 1800rpm, diesel engine; Emission compliant engine to stationary standby regulations. CONTROLS: Solid state, microprocessor-based generator controls; Controls shall provide all operating, monitoring and control functions for the generator set; Control panel is NFPA110 Compliant. ENCLOSURE/SILENCER: Complete diesel engine generator set including control panel, engine starting batteries and fuel oil tank shall be enclosed in a factory assembled weather protective, sound attenuated enclosure with oil and water drain lines; Enclosure shall be constructed from aluminum, preferably out of .125 thickness and 5058 marine grade aluminum; Critical grade silencer (25DB Reduction); Companion flanges; Flexible stainless-steel exhausts flex. FUEL TANKS: Double wall sub-base diesel fuel tank shall be integral to the enclosure; 24-hour capacity at 75% load rating; Rupture basin will be of 110% capacity; Locking fuel caps; All necessary vents and caps will be provided; Mechanical fuel level gauge; Low fuel level alarm contact; Fuel tank rupture basin alarm contact; Must meet UL 142 and FDEP standards. BATTERY CHARGER: Current limiting battery charger to automatically charge batteries; Charger shall be dual charge rate with automatic switching to boost rate when required; Charger shall be mounted on genset package. DELIVERY: Net cost includes delivery of equipment to governmental site location; Coordination and offloading of the equipment at the governmental site location will be the responsibility of the purchasing agency. STARTUP AND COMMISSIONING: Vendor must coordinate all startup and testing activities with the engineer and owner; After installation has been completed, approved by the local electrical inspector, and normal power is available, the vendor will perform a one (1) day startup including the use of building load; The startup technician will instruct all necessary personnel how to operate and maintain the equipment in accordance to the manufacturer's requirements. CONDITIONS: In addition to equipment specified, each generator shall be equipped with all standard equipment as specified by the manufacture for this model and shall include but not be limited to the following necessary items: Initial filling of oil and antifreeze; Shrink Wrap applied to the product to ensure a clean finish; During the startup, the technician shall record the following information and provide to the owner for his records: Record Operating Voltage, Hz, Ph, and connected load (Amperage); Package Information consisting of Make, Model, Serial number, and Startup Date; Record Engine and Generator Serial numbers. One complete set of operation and maintenance manuals; Two (2) years or 1000 hours standard standby generator warranty, whichever occurs first; Labor, materials, and travel for the warranty period repair will be paid by manufacturer during normal business hours.

**Contract:** FSA19-VEH17.0 , Heavy Trucks and Equipment

**Group:** GENERATOR: 500kW Mobile Generator Package

**Item:** 124, Atlas Copco, QAS 625 T4F, QAS 625 T4F

**Description:** GENERATOR REQUIREMENTS: Standby duty rated at 500kwe, 625kva, 0.8 power factor; Prime power duty rating 450kwe, 563kva, 0.8 power factor; Main Breaker shall be equipped with shunt trip; Generator end shall be Direct coupled to the engine flywheel with a flexible coupling; Generator shall meet performance class G3 of IEC. ENGINE: 6-cylinder, water cooled, 1800rpm, diesel engine; Current emission compliant diesel engine ; Spin on fuel and oil filters; Jacket water heater with service valves to ensure coolant does not need to be drained if heater needs service; 120vac, 1ph, 60hz input 10 amp, 24vdc, output automatic battery charger; Standard 4D lead acid batteries with battery rack and cables. VOLTAGE CHANGE OVER SWITCH AND DISTRIBUTION: Manual 2 position voltage change over switch to select each voltage as specified when the unit is not running 3ph 120/208, and 3ph 277/480'; Load leads shall be attached to the generator using two (2) forms and shall be rated for 2000 amps. Generator will be equipped with both; Five (5) compression lugs per phase rated for 400 amps each; A 20 amp, 120vac, 1ph, male receptacle shall be provided to power the jacket water heater; A 20 amp, 120vac, 1ph, male receptacle shall be provided to power the battery charger; Two thumb screw type connection points shall be provided for remote auto start. CONTROLS: Solid state, microprocessor-based generator controls; Controls shall provide all operating, monitoring and control functions for the generator set. Controls shall provide for auto start/stop functions; An emergency stop push button will be installed; A voltage adjustment shall be provided in the panel to adjust voltage in all voltage positions; A switch shall be provided in the panel to turn all power off in the panel if not being used; A front face mounted circuit breaker shall be provided to protect the panel from any D.C. spikes. ENCLOSURE: Complete diesel engine generator set including control panel, engine starting batteries and fuel tank shall be enclosed in a factory assembled weather protective, sound attenuated enclosure; The sound attenuated enclosure noise level is not to exceed 80 dba @ 21 feet; Enclosure shall be constructed from aluminum, preferably out of .125 thickness and 5058 marine grade aluminum; Oil and water drain lines shall be provided and extend to the enclosure wall with brass ball valves for easy service; Critical grade silencer (25db reduction); Companion flanges; Flexible exhaust-flex; Keyed-alike lockable doors. IN BASE FUEL TANK TRAILER: Trailer shall be DOT approved with proper serial number data plate indicating weight capacity minimum of 20,000 lbs.; Trailer will have dual axles with torque springs to reduce overall height of package; Standard 7 pin vehicle wiring connector to be supplied; Trailer will have two rear level jacks with sand shoes and front leveling jack; Trailer will have hydraulic brakes; Trailer will have all necessary safety equipment to include, but not be limited to, an adjustable and removable pintle hitch, 36-inch safety chains, fenders, lights per DOT, and break away cable; Tires will be minimum load range type "D" (8 ply rating) with matching steel rims; Rims are to be finish painted; Minimum 8-hour capacity at 75% load rating to determine single wall tank size; A mechanical fuel gauge will be provided; Locking fuel cap; Low fuel level alarm; All necessary vents and caps will be provided along with suction, return, and drain points. BATTERY CHARGER: Battery will be installed in holding container with battery cables; Current limiting battery charger to automatically charge batteries; Charger shall be dual charge rate with automatic switching to boost rate when required; Charger mounted inside generator set package; Fully charged battery will be provided at time of delivery and startup; 120-volt shore power connector for battery charger. STARTUP AND COMMISSIONING: One (1) day startup including operational test of equipment showing proper connection of cables with safety issues performed by a factory trained technician; The startup technician will instruct personnel how to operate and maintain the equipment in accordance with the manufacturer's requirements. CONDITIONS: In addition to equipment specified, each generator shall be equipped with all standard equipment as specified by the manufacturer for this model and shall include, but not be limited to, the following items: All product shall be new and of current design; Initial filling of oil and antifreeze (diesel fuel by others); During startup, the technician shall record the following information and provide to owner for his records: Operating Voltage, Hertz, Phase, and connected load (Amperage-if any);Written Information consisting of make, model, serial number, and startup date; Record Engine and Generator Serial numbers; One complete set of operation and maintenance manuals; Two (2) years or 1000 hours standard mobile generator warranty will apply, whichever occurs first; Generator to be transported to authorized servicing dealer for warranty repair during normal business hours. TRAILER: The trailer must have a VIN and a certificate of origin.

Term: October 1, 2019 - September 30, 2020

Contract: FSA19-VEH17.0 , Heavy Trucks and Equipment

Group: GENERATOR: 500kW Mobile Generator Package

Item: 127, Holland, PT6TPC-P1104D44T, PT6TPC-P1104D44T

**Description:** GENERATOR REQUIREMENTS: Standby duty rated at 500kwe, 625kva, 0.8 power factor; Prime power duty rating 450kwe, 563kva, 0.8 power factor; Main Breaker shall be equipped with shunt trip; Generator end shall be Direct coupled to the engine flywheel with a flexible coupling; Generator shall meet performance class G3 of IEC. ENGINE: 6-cylinder, water cooled, 1800rpm, diesel engine; Current emission compliant diesel engine ; Spin on fuel and oil filters; Jacket water heater with service valves to ensure coolant does not need to be drained if heater needs service; 120vac, 1ph, 60hz input 10 amp, 24vdc, output automatic battery charger; Standard 4D lead acid batteries with battery rack and cables. VOLTAGE CHANGE OVER SWITCH AND DISTRIBUTION: Manual 2 position voltage change over switch to select each voltage as specified when the unit is not running 3ph 120/208, and 3ph 277/480'; Load leads shall be attached to the generator using two (2) forms and shall be rated for 2000 amps. Generator will be equipped with both; Five (5) compression lugs per phase rated for 400 amps each; A 20 amp, 120vac, 1ph, male receptacle shall be provided to power the jacket water heater; A 20 amp, 120vac, 1ph, male receptacle shall be provided to power the battery charger; Two thumb screw type connection points shall be provided for remote auto start. CONTROLS: Solid state, microprocessor-based generator controls; Controls shall provide all operating, monitoring and control functions for the generator set. Controls shall provide for auto start/stop functions; An emergency stop push button will be installed; A voltage adjustment shall be provided in the panel to adjust voltage in all voltage positions; A switch shall be provided in the panel to turn all power off in the panel if not being used; A front face mounted circuit breaker shall be provided to protect the panel from any D.C. spikes. ENCLOSURE: Complete diesel engine generator set including control panel, engine starting batteries and fuel tank shall be enclosed in a factory assembled weather protective, sound attenuated enclosure; The sound attenuated enclosure noise level is not to exceed 80 dba @ 21 feet; Enclosure shall be constructed from aluminum, preferably out of .125 thickness and 5058 marine grade aluminum; Oil and water drain lines shall be provided and extend to the enclosure wall with brass ball valves for easy service; Critical grade silencer (25db reduction); Companion flanges; Flexible exhaust-flex; Keyed-alike lockable doors. IN BASE FUEL TANK TRAILER: Trailer shall be DOT approved with proper serial number data plate indicating weight capacity minimum of 20,000 lbs.; Trailer will have dual axles with torque springs to reduce overall height of package; Standard 7 pin vehicle wiring connector to be supplied; Trailer will have two rear level jacks with sand shoes and front leveling jack; Trailer will have hydraulic brakes; Trailer will have all necessary safety equipment to include, but not be limited to, an adjustable and removable pintle hitch, 36-inch safety chains, fenders, lights per DOT, and break away cable; Tires will be minimum load range type "D" (8 ply rating) with matching steel rims; Rims are to be finish painted; Minimum 8-hour capacity at 75% load rating to determine single wall tank size; A mechanical fuel gauge will be provided; Locking fuel cap; Low fuel level alarm; All necessary vents and caps will be provided along with suction, return, and drain points. BATTERY CHARGER: Battery will be installed in holding container with battery cables; Current limiting battery charger to automatically charge batteries; Charger shall be dual charge rate with automatic switching to boost rate when required; Charger mounted inside generator set package; Fully charged battery will be provided at time of delivery and startup; 120-volt shore power connector for battery charger. STARTUP AND COMMISSIONING: One (1) day startup including operational test of equipment showing proper connection of cables with safety issues performed by a factory trained technician; The startup technician will instruct personnel how to operate and maintain the equipment in accordance with the manufacturer's requirements. CONDITIONS: In addition to equipment specified, each generator shall be equipped with all standard equipment as specified by the manufacturer for this model and shall include, but not be limited to, the following items: All product shall be new and of current design; Initial filling of oil and antifreeze (diesel fuel by others); During startup, the technician shall record the following information and provide to owner for his records: Operating Voltage, Hertz, Phase, and connected load (Amperage-if any);Written Information consisting of make, model, serial number, and startup date; Record Engine and Generator Serial numbers; One complete set of operation and maintenance manuals; Two (2) years or 1000 hours standard mobile generator warranty will apply, whichever occurs first; Generator to be transported to authorized servicing dealer for warranty repair during normal business hours. TRAILER: The trailer must have a VIN and a certificate of origin.

**Bid Award**

Term: October 1, 2019 - September 30, 2020

Contract: FSA19-VEH17.0 , Heavy Trucks and Equipment

Group: PUMP: 6 Inch Mobile Pump Package

Item: 170, Pioneer, PP66S12L71, PP66S12L71

**Description:** DESIGN REQUIREMENTS: Discharge size: 6 inches; Suction size: 6 inches; Capable of 1750 GPM minimum; Capable of 160 ft. Total Dynamic Head (TDH) minimum; Duty Point, Maximum: 1,000 gallons per minute minimum (GPM) at 120 ft. Total Dynamic Head (TDH); Solids handling capability size, minimum size: 3 inches. ENGINE: Diesel engine, appropriate to pump size at continuous duty; Emission compliant engine; Industrial grade exhaust muffler and rain cap; Oil and coolant drain lines with ball valves; Low water level shutdown switch; 12vdc system with battery rack and cables; 50 gallon minimum fuel tank with low fuel level alarm and shutdown. PUMP: Check valve; Self-priming system. CONTROLS: Solid state, microprocessor-based pump controls; Controls shall provide all operating, monitoring and control functions for the pump set; Controller will also provide 2 fully programmable contacts for input and output signals accordingly; Controller will provide remote start stop control with adjustable ramp (speed) time control; UL 508 R and CSA C22.2 No. 14 approved. TRAILER: The manufacturer shall mount the diesel engine and pump unit with the above 50 gallon subbase tank on a street legal D.O.T. approved trailer; This trailer will be able to be rated for a safe travel at speeds of 60 mpg and not be limited to the following specifications: Trailer design shall be such that the County/City may easily remove the entire engine, fuel tank and pump from the trailer; 12vdc electric system; Lunette or military type towing ring with safety chains; Single point lifting bar; License plate bracket; Sand shoe type support stands front and rear; Torque spring axles to meet load of trailer; The trailer must have a VIN and a certificate of origin. STARTUP AND COMMISSIONING: Vendor must coordinate all startup and testing activities with the engineer/owner; After field delivery of the pump and trailer, an authorized factory representative shall perform the initial startup and field testing of the pump and trailer; If conditions permit, a site will be determined where connection will be made by the County/City to test the pump package; If a site cannot be prepared a standard operational test will be performed; At the same time the startup test is performed, the factory representative will provide all necessary operation, field maintenance and minor repair training as necessary; This will also include safety procedures and hazard assessment.

**Bid Award**

Term: October 1, 2019 - September 30, 2020

Contract: FSA19-VEH17.0 , Heavy Trucks and Equipment

Group: PUMP: 6 Inch Mobile Pump Package

Item: 172, Tradewinds, TPK064750, TPK064750

**Description:** DESIGN REQUIREMENTS: Discharge size: 6 inches; Suction size: 6 inches; Capable of 1750 GPM minimum; Capable of 160 ft. Total Dynamic Head (TDH) minimum; Duty Point, Maximum: 1,000 gallons per minute minimum (GPM) at 120 ft. Total Dynamic Head (TDH); Solids handling capability size, minimum size: 3 inches. ENGINE: Diesel engine, appropriate to pump size at continuous duty; Emission compliant engine; Industrial grade exhaust muffler and rain cap; Oil and coolant drain lines with ball valves; Low water level shutdown switch; 12vdc system with battery rack and cables; 50 gallon minimum fuel tank with low fuel level alarm and shutdown. PUMP: Check valve; Self-priming system. CONTROLS: Solid state, microprocessor-based pump controls; Controls shall provide all operating, monitoring and control functions for the pump set; Controller will also provide 2 fully programmable contacts for input and output signals accordingly; Controller will provide remote start stop control with adjustable ramp (speed) time control; UL 508 R and CSA C22.2 No. 14 approved. TRAILER: The manufacturer shall mount the diesel engine and pump unit with the above 50 gallon subbase tank on a street legal D.O.T. approved trailer; This trailer will be able to be rated for a safe travel at speeds of 60 mpg and not be limited to the following specifications: Trailer design shall be such that the County/City may easily remove the entire engine, fuel tank and pump from the trailer; 12vdc electric system; Lunette or military type towing ring with safety chains; Single point lifting bar; License plate bracket; Sand shoe type support stands front and rear; Torque spring axles to meet load of trailer; The trailer must have a VIN and a certificate of origin. STARTUP AND COMMISSIONING: Vendor must coordinate all startup and testing activities with the engineer/owner; After field delivery of the pump and trailer, an authorized factory representative shall perform the initial startup and field testing of the pump and trailer; If conditions permit, a site will be determined where connection will be made by the County/City to test the pump package; If a site cannot be prepared a standard operational test will be performed; At the same time the startup test is performed, the factory representative will provide all necessary operation, field maintenance and minor repair training as necessary; This will also include safety procedures and hazard assessment.

Term: October 1, 2019 - September 30, 2020

Contract: FSA19-VEH17.0 , Heavy Trucks and Equipment

Group: TRANSFER SWITCH: 600 Amp Automatic Transfer Switch

Item: 223, ASCO, Series 300, Series 300

**Description:** AUTOMATIC TRANSFER SWITCH: Maximum voltage rating of 600Vac, 60hz; 1ph or 3ph; Open transition (break-before-make) transfer logic; Transfer switch must meet the related industry standards: UL 1008 - Automatic transfer switches for use in emergency systems; CSA - Automatic transfer switches; NEMA - Industrial control and systems AC transfer switch equipment; IEC - Automatic transfer switching equipment. RATING: 600-amp, 3 pole, 277/480vac, 60hz; Enclosure type: NEMA 3r. FUNCTIONAL: The automatic transfer switch shall automatically transfer the load to the generator supply in the event of a utility supply failure and return the load to the utility supply upon restoration. The automatic transfer switch power switching devices shall be mechanically and electrically interlocked to prevent the utility and generator supplies from being interconnected. All timers should be field adjustable to ensure proper field site compatibility. AUTOMATIC SEQUENCE OF OPERATION: When the voltage on any phase of the utility supply is below present levels of rated voltage for a preset time delay, a contact shall close to initiate start of the standby generator. The load shall transfer to the generator supply when the generator voltage and frequency have reached acceptable present levels and the warm up time delay has expired. When the utility supply is restored to the above present levels of rated voltage on all phases, load transfer from generator to utility supply shall be initiated following expiry of the utility return timer. Once the transfer mechanism operates and opens the generator power switching device, the transfer mechanism shall stop in the neutral position (i.e. with the both power switching devices open) for the duration of the neutral delay timer setting to allow load voltage to decay prior to reconnecting the utility supply. The load shall be re-connected to the utility supply once the neutral delay timer expires and the transfer mechanism continues operation and closes the utility power switching device. The load shall immediately retransfer to the utility supply (if within acceptable limits) should the generator supply fail prior to the expiry of the utility transfer delay. The generator set shall continue to operate following a load transfer for a cool down delay period, and then a contact shall open to stop the generator set. An "on load" test mode may be initiated which shall cause a simulated utility failure condition and transfer the load to the generator set. The transfer sequence shall be the same as for a utility power failure except a neutral delay sequence shall occur when transferring from utility to a generator source. The load shall immediately retransfer to the utility supply (if within acceptable limits) should the generator supply fail during an "on load" test mode. FACTORY TESTING: A certified factory test report shall be shipped with each switch at time of shipment; The automatic transfer switch shall be factory tested prior to delivery to the purchaser; The following test shall be conducted by qualified factory personnel: Visual Inspection; Mechanical Tests; Electrical Tests; Final Inspection. FIELD TESTING AND COMMISSIONING: The automatic transfer switch shall be field tested once installed at the project site to confirm proper operation of the system; Schedule and witness testing activities shall be coordinated with the project engineer, site contractor, and owner as required in advance of the testing date; A qualified local factory-trained field representative shall conduct the necessary test to ensure proper operation of the switch. Visual Inspection: Electrical and Mechanical inspection to verify the installation is correct as recommended by the transfer switch manufacturer and as per National Electric Code (NEC) requirements. Mechanical Tests: As a minimum, the following mechanical tests shall be performed on the transfer switch: Power conductor torque verification; Verification of mechanical interlock; Manual ATS Mechanism Operation; All Mechanical Fasteners/Wire Connections Tight; Confirmations of correct transfer switch voltage, current and withstand ratings as is required for the application; Meggar testing the power cabling to the transfer switch; Verification of correct power cabling phasing and phase rotation prior to energization; Confirmation of settings for all timers & voltages sensors. Full Function Test-normal operation – 3 complete cycles of failing the utility supply, and transfer load to/from the generator set; Verification of all test modes operates correctly. CONDITIONS: In addition to equipment specified, each automatic transfer switch shall be equipped with all necessary equipment as specified by the manufacturer for this model and shall include but not be limited to the following necessary items: Shrink Wrap applied to the product to ensure a clean finish; One complete set of operation and maintenance manuals; A two (2) year or 1500 hour from date of standard standby warranty will apply from date of successful startup; Labor, materials, and travel for the warranty period repair will be paid by manufacturer during normal business hours.

Term: October 1, 2019 - September 30, 2020

Contract: FSA19-VEH17.0 , Heavy Trucks and Equipment

Group: TRANSFER SWITCH: 600 Amp Automatic Transfer Switch

Item: 225, Cummins, OTEC, OTEC

**Description:** AUTOMATIC TRANSFER SWITCH: Maximum voltage rating of 600Vac, 60hz; 1ph or 3ph; Open transition (break-before-make) transfer logic; Transfer switch must meet the related industry standards: UL 1008 - Automatic transfer switches for use in emergency systems; CSA - Automatic transfer switches; NEMA - Industrial control and systems AC transfer switch equipment; IEC - Automatic transfer switching equipment. RATING: 600-amp, 3 pole, 277/480vac, 60hz; Enclosure type: NEMA 3r. FUNCTIONAL: The automatic transfer switch shall automatically transfer the load to the generator supply in the event of a utility supply failure and return the load to the utility supply upon restoration. The automatic transfer switch power switching devices shall be mechanically and electrically interlocked to prevent the utility and generator supplies from being interconnected. All timers should be field adjustable to ensure proper field site compatibility. AUTOMATIC SEQUENCE OF OPERATION: When the voltage on any phase of the utility supply is below present levels of rated voltage for a preset time delay, a contact shall close to initiate start of the standby generator. The load shall transfer to the generator supply when the generator voltage and frequency have reached acceptable present levels and the warm up time delay has expired. When the utility supply is restored to the above present levels of rated voltage on all phases, load transfer from generator to utility supply shall be initiated following expiry of the utility return timer. Once the transfer mechanism operates and opens the generator power switching device, the transfer mechanism shall stop in the neutral position (i.e. with the both power switching devices open) for the duration of the neutral delay timer setting to allow load voltage to decay prior to reconnecting the utility supply. The load shall be re-connected to the utility supply once the neutral delay timer expires and the transfer mechanism continues operation and closes the utility power switching device. The load shall immediately retransfer to the utility supply (if within acceptable limits) should the generator supply fail prior to the expiry of the utility transfer delay. The generator set shall continue to operate following a load transfer for a cool down delay period, and then a contact shall open to stop the generator set. An "on load" test mode may be initiated which shall cause a simulated utility failure condition and transfer the load to the generator set. The transfer sequence shall be the same as for a utility power failure except a neutral delay sequence shall occur when transferring from utility to a generator source. The load shall immediately retransfer to the utility supply (if within acceptable limits) should the generator supply fail during an "on load" test mode. FACTORY TESTING: A certified factory test report shall be shipped with each switch at time of shipment; The automatic transfer switch shall be factory tested prior to delivery to the purchaser; The following test shall be conducted by qualified factory personnel: Visual Inspection; Mechanical Tests; Electrical Tests; Final Inspection. FIELD TESTING AND COMMISSIONING: The automatic transfer switch shall be field tested once installed at the project site to confirm proper operation of the system; Schedule and witness testing activities shall be coordinated with the project engineer, site contractor, and owner as required in advance of the testing date; A qualified local factory-trained field representative shall conduct the necessary test to ensure proper operation of the switch. Visual Inspection: Electrical and Mechanical inspection to verify the installation is correct as recommended by the transfer switch manufacturer and as per National Electric Code (NEC) requirements. Mechanical Tests: As a minimum, the following mechanical tests shall be performed on the transfer switch: Power conductor torque verification; Verification of mechanical interlock; Manual ATS Mechanism Operation; All Mechanical Fasteners/Wire Connections Tight; Confirmations of correct transfer switch voltage, current and withstand ratings as is required for the application; Meggar testing the power cabling to the transfer switch; Verification of correct power cabling phasing and phase rotation prior to energization; Confirmation of settings for all timers & voltages sensors. Full Function Test-normal operation – 3 complete cycles of failing the utility supply, and transfer load to/from the generator set; Verification of all test modes operates correctly. CONDITIONS: In addition to equipment specified, each automatic transfer switch shall be equipped with all necessary equipment as specified by the manufacturer for this model and shall include but not be limited to the following necessary items: Shrink Wrap applied to the product to ensure a clean finish; One complete set of operation and maintenance manuals; A two (2) year or 1500 hour from date of standard standby warranty will apply from date of successful startup; Labor, materials, and travel for the warranty period repair will be paid by manufacturer during normal business hours.
