## **QUESTIONS & ANSWERS**

Q #1: Is the existing floating dock and gangway going to be removed for future use or will we be disposing of them?

A #1: The floating dock and gangway are to be removed and disposed of by the contractor.

Q #2: What are the permits required?

A #2: The contractor will be responsible for acquiring a building permit for this project. The other required permits (SRWMD, US Army Corps) have already been filed for and will be made available to the contractor before the start of construction.

Q #3: Is there a Geotechnical Report available?

A #3: There is not a geotechnical report available for this project.

Q #4: Could you please clarify the depth of the 6x6 post? Sheet 4.2 shows a dimension of 3' embedment but the notes call for 4.25'?

A #4: The depth of the 6x6 posts is specified to provide a minimum of 3' of embedment for all posts. In the event that the unbraced length (distance from natural grade to the bottom of the boardwalk beam) is greater than 5', a minimum of 4' of embedment is required. Notes 1A and 1B only apply when the unbraced length is greater than 5'.

Q #5: The duration is pretty quick for this scope of work, it is suggested to extended project to 180 days.

A #5: The county will not be extending the project timeline.

Q #6: Please see attached reference from plans for Boardwalk Rest Area – C4.4 Sheet is not in the plan set for this detail.

A #6: See Attached plans.

Q #7: Do the Alternates mean for the price to be add or deduct to the base bid, or is it a complete cost for the doing the item complete?

A #7: The Base BIDs are for the total cost of the project. The ALT 1 is an add/deduct to the base bid. ALT 2 will be a total price for the removal and replacement of the existing 6' boardwalk with a 6' boardwalk (remove and replace) in lieu of the Base Bid and should include all cost for this option, this is needed for FEMA cost and reimbursement. The ALT 3 is an add/deduct to ALT 2 if that options is selected. The ALT 4 is an add/deduct to the base bid. The ALT 5 is an add/deduct option for a secondary boardwalk. The ALT 6 is an add/deduct to the ALT 5. Please refer to page 60 of the BID document for any additional details.

**NOTE:** You should acknowledge receipt of this addendum on your Bid Form.

## **6.1 DESCRIPTION OF WORK PROCESS WHEN HANDLING GOVERNMENT CONTRACTS**

Midcoast Construction Enterprises, LLC has been performing government contracts since 2013. The owners sole client experience prior to opening into commercial and privatized markets was in strictly government clients since 2004 when he started working in the field of site development and underground utilities.

Our approach to working with government entities is driven by good communication. We believe that with a good line of communication everything else within the project falls into place. This starts with our first meeting where we take the time to introduce ourselves and the staff that will be working on the project. We then follow up with a prompt submittal process. The submittal process is very important and requires our firm to work directly with the engineer of record to ensure our client is receiving the exact product that they are looking for to be utilized on the project. Lastly, we follow up with a schedule. Our goal is to meet the deadline of the contract to ensure that the Town/City and its residents are back up and running as normal.

A focus on communication, details, & adhering to the schedule always makes for a smooth construction process when dealing with government entities.
