"The Gainesville Megaphone" – a place to amplify aspirations and truly listen to the community".

"The Gainesville Megaphone"
Etched polished granite, Polished Brass and Stainless Steel

The work is a reference to the need for local people to have their voice and is symbolic of being amplified and the need for interaction.

The work will be truly interactive and tactile allowing adults and children alike to use the sculpture to hear speak and record their voices by sitting, laying and using the sculpture as a fun living work of Art whilst still being symbolic of the need to be heard and allowing communication on an open and transparent level.
