Curtis Andrew Loftus

Objective:

Secure a position where my talents and abilities are used, provide a team with a productive work ethic, and grow with an ambitious and driven company.

Work Experience:

Owner, Loftus Family Farms January 2015 to Present
<https://www.loftusfamilyfarm.com/>

- Grower of Muscadine grapes, u-pick farm located in north Alachua County

Lofthouse, Inc. August 2019 to present
<https://lofthousehomes.com/>

Site development coordinator and property development assistant.

- Primary duties include property redevelopment through means of mechanical deconstruction and overseeing new home setups that provide not only affordable housing solutions for our area, but revitalizes derelict properties and improves mostly rural communities.

All Terrain Enterprises, Inc January 2008 to August 2019 Gainesville, FL
Owner & operator
Maintenance and construction contracting company
<http://www.allterrainenterprises.com/>

Primary responsibilities as owner are to service reliable clients as well as secure new customers; building a personal relationship and providing them with the quality services that my company provides.

Primary duties:

- March 2015-August 2019 Forestry mulching specialist providing land clearing, site prep, and forest land management solutions for private land owners, municipalities, and government contracts.
- Construction fencing projects, and reconstruction of damaged structures. Using a variety of tools, equipment, and mathematical techniques, projects result in a superior finished product.
- Provide selective demolition and deconstruction services at industrial manufacturing and processing facilities. Worked with plant officials and employees, to maintain a safe and seamless operation with minimal production interference.
- Sub-contractor for Cook Manufacturing Group, Inc (see job history below)

Brightstone Concrete Polishing March 2007- January 2008 Gainesville, FL
Certified Master Craftsman

- Lead machine operator providing customers with a superior high-impact floor system
- As a foreman, I was responsible for timely completion of polishing projects and managing employees allowing for not only a productive job, but a quality job.
- Customer service and project expectations manager ensuring every customer was a well satisfied customer.

Cook Manufacturing Group, Inc. June 2003-March 2007 Frostproof, FL
Contractor March 2007-Present
Equipment Service/Troubleshooting Technician and Welder/Mechanic

- Execute maintenance, repair, and troubleshooting tasks on rotating, reciprocating, and self contained equipment at industrial and food processing facilities at locations across the USA ensuring safe and reliable operation.
- Independently manage travel responsibilities and entrusted with company equipment, materials and employees well being.

- Operator of company and plant owned equipment such as fork lifts, lull lifts, man lifts up to 110 feet, all terrain and truck mounted cranes, overhead lift cranes, and company trucks to perform my duties safely and efficiently.
- Broad usage and knowledge of personally and company owned steel fabrication tools and equipment, such as welders, torches, plasma cutters, carbon arc gouging, abrasive tools, and specialized metal fitting tools to execute custom fitted and retrofitted processing equipment.
- Working with my team to provide a safe, clean and productive work environment by adhering to OSHA, company, and plant safety regulations resulting in a zero lost time accident safety record.
- Using professional vibration analysis technology, perform diagnostics on rotating equipment and balance that equipment ensuring reliable usage and prolonging the life of their wear components.
- Working with a team to systematically disassemble, refurbish, ship, and re-erect T.A.S.T.E and Waste Heat Evaporator Towers for product concentration in industries of fruit, fish, and glycol improving plant efficiencies and creating more marketable products
- Install, troubleshoot, and repair pneumatic, electrical, hydraulic, and manual control systems

Education:

Florida Radon Certification Program

- Florida State Radon Mitigation Specialist
 - Florida State Radon Measurement Technician
- Providing measurement and mitigation services improving air quality to standards provided by the EPA.

International Polished Concrete Institute

- Certified Master Craftsman

OSHA And Company administered training courses completed

- Forklift
- Confined space attendant and entrant
- First responder training
- Overhead work training

- Rigging and signals
- Lock-out / Tag-out procedures
- Various other contractor safety training courses
- Extensively used safety belt and harness equipment in conjunction with OSHA standards for off-platform and elevated work

Santa Fe College

- Accreted welding certification program
- Mechanical Engineering course of study

University of Florida

- Mechanical Engineering course of study
- Internship semester through College of Agriculture with Cook Manufacturing Group
