Background:

The applicant is requesting to change the land use on approximately 92 acres of land in the southwest quadrant of the Springhills Activity Center in anticipation of developing the property. The existing land uses were established when the activity center was created and reflect a mix of warehouse and office uses. The new land use designations will allow continued light industrial uses while introducing residential uses within the activity center. The proposed Conservation land use will allow protection of identified resources located within this quadrant of the Activity Center.
